

Technology Leaders Program

Placements Report 2022

In partnership with

Berkeley
UNIVERSITY OF CALIFORNIA

P PURDUE
UNIVERSITY

From the Director's Desk

"The Technology Leaders Program (TLP) offered by Plaksha University is a 1-year program that interweaves courses in Artificial Intelligence and Data Science Core, Design Thinking, Self and Leadership, and real-world experiences comprising Entrepreneurial Challenge Lab and Capstone projects. The Program was started in 2019 imbibing the key principles of Plaksha University's philosophy of reimagining technology education through an interdisciplinary curriculum, enabling an entrepreneurial ecosystem and promoting industry-academia collaboration.

Faculty from Plaksha University as well as institutions like UC Berkeley, Purdue University, University of Maryland, University of Pennsylvania, Carnegie Mellon University, IIT Bombay, IIT Delhi and from corporates like Microsoft group, HRS and others have taught at the Program. Our students have been mentored by eminent business leaders and entrepreneurs through their TLP journey.

We have successfully graduated close to 170 students in the last 3 years. Our students have gone on to have successful career outcomes in the fields of Data Science, Data Engineering, Data Analytics, Machine Learning Engineering, Business Analysis, Product Management, and Research. Some students have chosen to pursue higher studies in global institutions like the University of Toronto, New York University, KTH Royal Institute of Technology etc. A few alumni have chosen to create their own entrepreneurial ventures ranging from neurosciences to building smart AI meeting tools and have achieved considerable success therein. Companies like Amazon, Arcesium, Boston Consulting Group, Cisco, Fractal Analytics, Info Edge (India) Ltd. and Walmart Labs have recruited from the Program over the years.

The Class of 2022 performed well during the placements season and received offers from a diverse spectrum of companies in sought-after roles at attractive packages.

I would also like to take this opportunity to thank all our mentors and recruiters for their partnership with the Class of 2022 and look forward to their continued support for the Class of 2023."

Industry-wise Offers

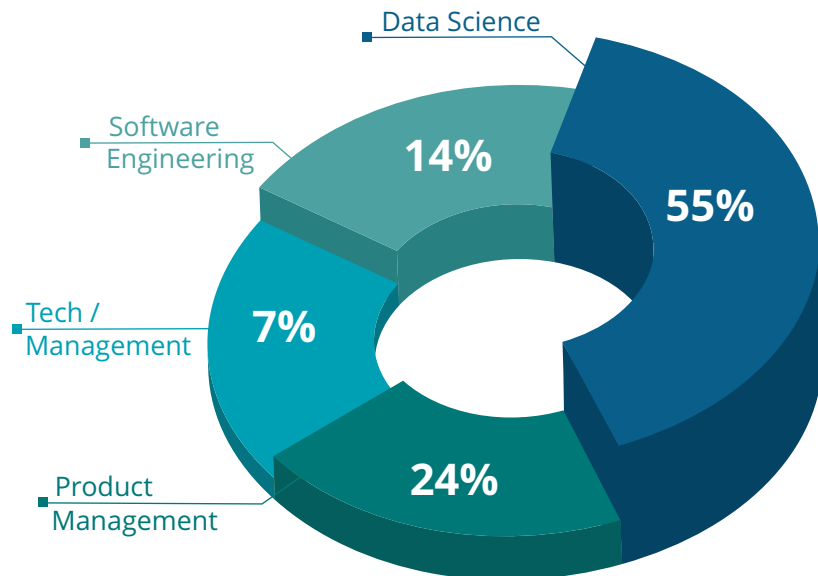

Pawan Reddy

ML Engineer at Arcesium

"What really stood out for me was the quality peer interactions at TLP. I will cherish these interactions that ranged from philosophy, finance, block chain, politics to creating a new Data Science product from scratch. If not for TLP, it would have been tough to find so many passionate people in a single place trying to do things differently and creatively."

Role-wise Offers

One Program, Many Paths to Success*

Corporate Careers

80% of students have landed dream roles as Data Scientists, Data Engineers, Machine Learning Engineers, Product Managers, Product Analysts and more.

Tanya Ahuja, TLP Class of 2022

Data Engineer at Educational Initiatives

"I think it would have been impossible to transition successfully to a career in AI-ML had it not been for the opportunity I got in terms of good companies interviewing us at campus."

Apratim Chandra Singh, TLP Class of 2022

Product Manager at Info Edge (India) Limited

"Plaksha was a truly transformative experience for me. From the practical lessons in the classroom to learning from industry veterans - TLP indeed goes beyond the obvious to make its tech leaders a cut above the rest."

Arunima Mor, TLP Class of 2022
Business Analyst at Amazon

"Our placement season starts soon after the Capstone projects. The team organizes various sessions to help the students prepare for taking interviews. I am very grateful to our Program team and alumni network who extensively helped us by taking multiple mock interviews, practice coding sessions, reviewing our resumes and connecting us to the right people."

Career Advancement Initiatives at Plaksha

Placement and Internship support

Career Advancement Centre connects Plaksha students to corporates for internship and placement opportunities.

Career Development Cell

Empowered group of students actively lead the planning and implementation of career enhancement initiatives for the entire cohort
